| Preface | ix |
| Abbreviations | xiii |
| Chapter 1 <i>Climate Change as a Global Environmental Problem</i> | 1 |
| 1.1 Today's vision of the global warming: principal conclusions from the IPCC Assessment Reports | 1 |
| 1.1.1 Understanding of human-induced climate change | 1 |
| 1.1.2 Evidences of recent climate change | 7 |
| 1.1.2.1 The Global Picture | 7 |
| 1.1.2.2 Regional evidences | 13 |
| 1.1.3 Observed effects of and attributing climate change | 19 |
| 1.1.4 Future climate change in the near and long term | 22 |
| 1.1.5 Current knowledge about future climate change impacts | 27 |
| 1.2 Climate change impacts and dangers: recent interpretations | 32 |
| 1.2.1 Conceptual background | 32 |
| 1.2.2 Critical levels, thresholds and key vulnerabilities | 36 |
| 1.2.3 Climate risks and 'reasons for concerns' | 44 |
| 1.2.4 To evaluation of danger climate change impacts | 47 |
| 1.3 Climate change – a new type of strategic problems and policy support | 51 |
| 1.3.1 Climate change as environmental problem | 52 |
| 1.3.2 Confronting climate change as economic problem | 56 |
| 1.3.2.1 Economic features of climate change | 56 |
| 1.3.2.2 Cost and benefits of climate impacts | 59 |
| 1.3.3 Climate change and security | 64 |
| 1.3.3.1 Environmental security | 64 |
| 1.3.3.2 Human security | 69 |
| 1.3.3.3 Environmental insecurity and vulnerability | 70 |
| 1.3.3.4 Environmental security and conflicts | 73 |
| 1.3.3.5 Climate change and security | 76 |
| 1.3.4 A climate policy framework: balancing policy and politics | 82 |
| 1.3.4.1 Some issues in practical policy design | 82 |
| 1.3.4.2 Integration of policies for climate and global changes | 85 |
| 1.3.4.3 Law and international compliance regime | 92 |

| | |
|---|------------|
| 1.3.4.4 Framing the future policy efforts | 94 |
| Chapter 2 <i>Environmental Policies and Management: Integrating Environment in Strategic Decision-making</i> | 97 |
| 2.1 Environmental impacts and their assessment | 97 |
| 2.1.1 Environmental impact issue | 97 |
| 2.1.2 Environmental Impact Assessment | 101 |
| 2.1.3 SEA in the context of environment assessment | 102 |
| 2.1.4 Surveying the SEA field | 105 |
| 2.1.4.1 The essence of discussion | 105 |
| 2.1.4.2 SEA approaches | 109 |
| 2.1.4.3 SEA principles | 110 |
| 2.1.5 Problems of scale in Environmental Assessment | 115 |
| 2.1.5.1 Scale issues | 115 |
| 2.1.5.2 Scale and data | 119 |
| 2.1.6 Evaluating environmental assessment systems | 120 |
| 2.1.6.1 Environmental indicators | 120 |
| 2.1.6.2 Effectiveness and effectivity of environmental assessment | 122 |
| 2.1.7 Future directions and ways forward | 126 |
| 2.1.7.1 Strengthening and improving environmental assessment | 126 |
| 2.2.7.2 Integrated Environmental Assessment | 128 |
| 2.1.8 Environmental Assessment in transition countries | 138 |
| 2.1.8.1 Background and history | 138 |
| 2.1.8.2 Difficulties of transitioning to EIA/SEA and their effectiveness in EIT countries | 142 |
| 2.1.8.3 Tasks to be solved | 145 |
| 2.2 Environmental management | 148 |
| 2.2.1 Linking environment with conventional decision making | 148 |
| 2.2.2 Environment and management | 155 |
| 2.2.2.1 From strategic environmental management to earth system government | 155 |
| 2.2.2.2 Environment and business: corporate environmental management | 160 |
| 2.2.2.3 Environmental management of natural resources | 164 |
| 2.2.3 Environmental assessment and decision making | 170 |
| 2.2.3.1 Decision-oriented environmental assessment | 170 |
| 2.2.3.2 EA and decision-making in the framework of Project Cycle Management | 172 |
| 2.2.3.3 SEA and decision-making | 173 |
| 2.3 Environmental policies and law | 179 |
| 2.3.1 Integration of the environment in policy-making | 179 |
| 2.3.2 Instruments of environmental policy | 180 |
| 2.3.3 Institutional complexity of environmental policy and law | 186 |

| | | |
|---|---|------------|
| 2.3.4 | Evolution of EA policy and law research in transitional countries | 189 |
| 2.3.4.1 | Environmental law and policy research and networks | 189 |
| 2.3.4.2 | Toward adaptive EA policy systems in countries in transition | 191 |
| 2.3.4.3 | Legislation in NIS | 193 |
| 2.3.4.4 | Implementation of EC Environmental Legislation | 196 |
| Chapter 3 <i>Vulnerability and Adaptation to Climate Change</i> | | 201 |
| 3.1 Resilience, vulnerability and adaptation concepts in socio-environmental science | 201 | |
| 3.1.1 | To meaning of terms and concepts | 201 |
| 3.1.2 | Resilience | 203 |
| 3.1.2.1 | Resilience as a concept | 203 |
| 3.1.2.2 | Resilience management and governance | 204 |
| 3.1.3 | Vulnerability | 207 |
| 3.1.3.1 | Concept of vulnerability: evolution of understanding | 207 |
| 3.1.3.2 | Linkages between resilience and vulnerability | 210 |
| 3.1.3.3 | Conceptual framework of vulnerability | 212 |
| 3.1.3.4 | Vulnerability assessment and management | 216 |
| 3.1.4 | Adaptation in environmental science | 224 |
| 3.1.4.1 | General treatment of the adaptation concept | 224 |
| 3.1.4.2 | Linkages between vulnerability, resilience and adaptive capacity .. | 226 |
| 3.2 Vulnerability to climate change | 229 | |
| 3.2.1 | Interpretations of vulnerability in climate change research | 229 |
| 3.2.2 | Interplay of risk and vulnerability | 237 |
| 3.2.3 | Assessment of vulnerability | 239 |
| 3.3 Adaptation to climate change | 246 | |
| 3.3.1 | Climate change adaptation as a concept | 246 |
| 3.3.2 | Adaptive capacity to climate change | 254 |
| 3.3.2.1 | Capacity and the climate change problem | 254 |
| 3.3.2.2 | Adaptive capacity and vulnerability | 257 |
| 3.3.2.3 | Assessment of adaptive capacity | 258 |
| 3.3.3 | The shaping of adaptation policy | 260 |
| 3.3.4 | Adaptation policy framework | 267 |
| 3.3.5 | Technologies for adaptation to climate change | 271 |
| 3.3.5.1 | The principal typology of adaptation | 271 |
| 3.3.5.2 | Role of policy in shaping adaptation | 276 |
| 3.3.5.3 | Social vulnerability approach | 279 |
| 3.3.6 | Effectiveness and success of adaptation | 281 |
| 3.3.6.1 | Residual impacts as a measure of success | 281 |
| 3.3.6.2 | Efficiency of adaptation as its benefits | 283 |
| 3.3.6.3 | Success of adaptation across scales | 287 |
| 3.3.6.4 | Measurement of adaptation effectiveness | 289 |
| 3.3.7 | Key problems in adaptation research | 292 |

| | |
|---|------------|
| Chapter 4 Adaptation Politics and Regulations in the Administration of Climate Change Regime | 297 |
| 4.1 Dichotomy of climate policy: adaptation and mitigation | 297 |
| 4.1.1 Avoiding the unmanageable and managing the unavoidable | 297 |
| 4.1.2 Conceptual history of adaptation as a policy approach | 299 |
| 4.1.3 Nexus of adaptation and mitigation: links and distinctions | 304 |
| 4.1.4 Integration of adaptation and mitigation policies | 310 |
| 4.2 International efforts in confronting climate change within environmental impact assessment | 315 |
| 4.2.1 Rationale for collective actions | 315 |
| 4.2.2 Covergence and diffusion of environmental policies | 320 |
| 4.2.3 Short history and contents of international cooperation in combating climate change | 324 |
| 4.2.4 Enhancing the success of climate treaties through international cooperation .. | 328 |
| 4.2.4.1 International cooperation in the context of global warming | 328 |
| 4.2.4.2 Financing and insurance as adaptation options | 333 |
| 4.2.4.3 Pioneer countries and leaderships | 351 |
| 4.3 Technology policies for climate targets | 355 |
| 4.3.1 Technological change as process | 356 |
| 4.3.2 Policies for development of more advanced technologies to fight climate change | 357 |
| 4.3.3 International technology collaboration: Technology diffusion and transfer | 364 |
| 4.3.4 Technological change and uncertainty | 370 |
| 4.3.5 Technology needs assessment: Azerbaijan's vision & Tajikistan case study .. | 372 |
| 4.4 Uncertainty in climate policy analysis and policy making | 378 |
| 4.4.1 Policy decisions with the uncertain future | 378 |
| 4.4.2 Uncertainty in theoretical perspective | 381 |
| 4.4.3 Uncertainty in model-based decision support | 386 |
| 4.4.4 Dealing with uncertainty and risk | 390 |
| 4.4.4.1 Integrated Assessment, decision making, modeling | 390 |
| 4.4.4.2 Uncertainty in risk analysis | 392 |
| 4.4.4.3 Learning as a way to diminish uncertainty | 395 |
| 4.4.5 Managing an uncertain future climate | 396 |
| 4.4.6 Communicating uncertainty and risk | 406 |
| 4.5 Evaluation of policy instrument and policy programs | 411 |
| 4.5.1 Evaluation in a policy cycle | 411 |
| 4.5.2 Some methods of policy analysis | 413 |
| 4.5.2.1 Program theory and logic model analysis | 413 |
| 4.5.2.2 The theory-based policy evaluation method | 415 |
| 4.5.2.3 Outcome evaluation based on socio-technical systems approach . | 418 |
| 4.5.2.4 Assessing integrated mitigation-adaptation strategies | 421 |

Chapter 5 Climate Change, Sustainable Development and Transition ... 423

| | |
|--|------------|
| 5.1 Sustainable development as a problem | 423 |
| 5.1.1 A short excursus in the history of sustainability concept | 424 |
| 5.1.2 A structural model of sustainable development: definition and essence | 426 |
| 5.1.2.1 Economic dimension | 433 |
| 5.1.2.2 Environmental dimension | 434 |
| 5.1.2.3 Social dimension | 436 |
| 5.1.3 Environmental ethics and morality of sustainable development | 438 |
| 5.1.3.1 Changing behavior and interventions: a short background | 438 |
| 5.1.3.2 Determinants of behaviour | 440 |
| 5.1.3.3 Policy instruments to change behavior and consumption | 443 |
| 5.1.4 Regional versus global | 447 |
| 5.1.5 Sustainability assessment | 452 |
| 5.1.5.1 Clarifying the problem | 452 |
| 5.1.5.2 Integrated sustainability assessment | 454 |
| 5.1.5.3 Sustainability planning appraisal | 459 |
| 5.2 Transition and development | 466 |
| 5.2.1 Process of transition and countries in transition | 466 |
| 5.2.2 Transition as development | 469 |
| 5.2.3 EU integration | 474 |
| 5.2.4 Institutional dimensions of transition to sustainability | 477 |
| 5.2.4.1 Essence of institutional frameworks | 477 |
| 5.2.4.2 Nature of the institutional change in transition | 480 |
| 5.2.4.3 Institutional capital in governing sustainability | 483 |
| 5.2.4.4 Institutional dimensions of climate change policy | 488 |
| 5.3 Climate change and development: potential damages and opportunities | 489 |
| 5.3.1 Putting climate change in the context of sustainable development | 489 |
| 5.3.2 Nexus of climate change and sustainable development policies | 494 |
| 5.3.3 Regionalization and globalization discourses | 501 |
| 5.3.4 Sustainable development and adaptation | 505 |
| 5.3.4.1 Mainstreaming adaptation and adaptive capacity in sustainable development | 505 |
| 5.3.4.2 A conceptual framework of synergistic adaptive capacity | 510 |
| 5.3.4.3 Integration of adaptation and mitigation in sustainable development policies | 514 |
| 5.3.5 Building capacities to confront climate change | 515 |
| 5.3.5.1 Capacity for sustainable development | 515 |
| 5.3.5.2 Capacity 2015 platform | 518 |
| 5.3.5.3 Capacity building in confronting climate change | 520 |
| 5.3.5.4 Practice of capacity-building in countries with economies in transition | 523 |
| 5.3.6 Evaluation of climate change and sustainable development relationships . | 529 |

| | |
|--|------------|
| Chapter 6 <i>Public Awareness and Scientific Research</i> | 533 |
| 6.1 Public awareness and participation | 533 |
| 6.1.1 Participatory processes in environmental management | 533 |
| 6.1.2 Public inclusion in climate change policy | 539 |
| 6.1.2.1 Target setting | 539 |
| 6.1.2.2 Human cognition and adaptive capacity | 541 |
| 6.1.3 Stakeholder participation | 542 |
| 6.1.3.1 Stakeholders as actors in environmental management | 542 |
| 6.1.3.2 Stakeholders in policy analysis | 555 |
| 6.1.3.3 Integrating stakeholders and environmental management | 556 |
| 6.1.3.4 Stakeholder perceptions of climate change | 557 |
| 6.1.3.5 NGO participation | 562 |
| 6.1.4 Public participation in research and practice | 563 |
| 6.1.4.1 Public participation from a methodological perspective | 563 |
| 6.1.4.2 Some methods of public participations | 565 |
| 6.1.4.3 Mass media and communication | 568 |
| 6.1.5 Efficiency of public participation | 572 |
| 6.1.5.1 Necessity and ways to strengthen efficiency of public participation | 572 |
| 6.1.5.2 ‘Ownership’ as a factor of public participation in natural resource management | 578 |
| 6.2 Science and scientific research in climate change policy | 580 |
| 6.2.1 Bridging research and policy | 580 |
| 6.2.1.1 Science in environmental and social policies | 580 |
| 6.2.1.2 Building science-policy interface | 583 |
| 6.2.1.3 Knowledge systems for sustainable development | 586 |
| 6.2.2 Science in climate change-policy discourse | 589 |
| 6.2.2.1 From policy for science to science for policy | 589 |
| 6.2.2.2 Trends in vulnerability and adaptation research | 591 |
| 6.2.2.3 Incorporating local knowledge in climate change research | 592 |
| 6.2.2.4 Climate science-policy interfaces in international contexts | 594 |
| 6.2.3 Implementation of scientific knowledge | 596 |
| 6.2.3.1 Science and practice | 596 |
| 6.2.3.2 Information and communication in science-practice interface | 602 |
| 6.2.3.3 Science-based stakeholder dialogue | 605 |
| 6.2.3.4 Science and policy in the environmental assessment process | 609 |
| 6.2.4 A long-term strategy: Tasks on the future | 612 |
| Annex 6.1 | 614 |
| References | 617 |
